

Future Fleet Garmin Solution

For businesses with a mobile workforce

The **Future Fleet Garmin Solution** is Future Fleet's latest product, offering businesses a total solution consisting of NextG compliant/GPRS/GPS hardware, real-time web based software and a Garmin touch screen mobile data terminal.

The Future Fleet Garmin Solution allows you, at a glance, to locate your vehicles in real-time without the added expense of mobile phone calls. Find the nearest vehicle to the job, allocate and dispatch the job to the driver and send messages, all in real-time.

The solution is web based and requires no additional software. Customers log onto Future Fleet where they have access to a variety of extensive reports including beginning to end report, job trips, geo-boundaries and speeding.

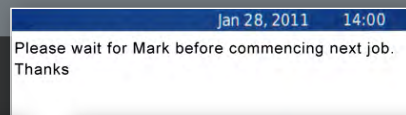

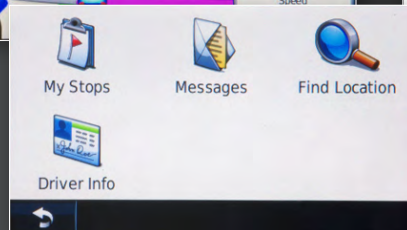

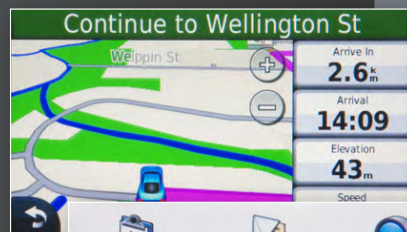

Features:

- NextG compliant/GPS/GPRS tracking device
- Touchscreen mobile data terminal
- Turn-by-turn visual and voice navigation
- 2-way messaging
- Real-time tracking, job dispatch
- Live job status and driver status

Benefits:

- Optimise travel routes
- Reduce fuel usage and cost
- LIVE job progress and status tracking
- Increase job productivity
- Monitor driver behaviour
- Improve driver safety
- Improve customer service
- Streamline communications
- Locate the nearest driver to the job
- Improve response times
