

Future Fleet WT5000

Vehicle Tracking & Communication Platform by WebTech

- ▶ Track your vehicle in real-time
- ▶ Keep track of your vehicle usage eg. logbook
- ▶ Know where your staff members are at all times

The **WT5000** is a feature-rich device at the heart of Future Fleet's web based system, that provides mapping and reporting to optimize fleet management. The WebTech 5000 is fully configured over-the-air and supports remote upgrades.

GPS based location and status reporting on GSM / GPRS networks

- ▶ Store and forward capability - store up to 2000 records
- ▶ Improved GPS - based location accuracy (WAAS)
- ▶ Real-time vehicle tracking and status monitoring
- ▶ Optional wireless bluetooth internet connectivity

Telemetry Port

- ▶ Vehicle monitoring & control capabilities
- ▶ Supports 2x digital inputs (used for PTO, door open, panic button etc)
- ▶ Supports 2x digital outputs (used for ignition isolation, alarm activation etc)
- ▶ Supports 1x auxiliary serial port (used to interface to other peripherals including PDA's, laptops etc)

Over-the-air configuration & software upgrades

- ▶ Modify your locator functionality quickly and easily
- ▶ Reduce the cost to upgrade your locator with remote upgrade capability

Specifications

GPS Receiver

- 12 channel GPS receiver module
- 10m accuracy (CEP)
- NMEA protocol supported

Power

- 12V / 24V
- Current Consumption: 150 mA (Typical)
- Hibernate Mode: <10 mA

Physical Specification

- Dimension: 90mm x 110mm x 28mm
- Weight: 150g
- Casing: Polymer housing

Battery Backup

- Optional Backup Battery Available

GSM Transceiver

- Tri Band GSM/GPRS Motorola G20

Memory / Storage

- 2000 Logs
